Subject: Concerns about time to review proposed changes for growth management

Dear Commissioners,

I am a Pitkin County resident and property owner who has just been made aware of changes suggested for growth management in our county. While I find this topic very important to review for our future here, I am concerned that it seems to be a hasty process without notifications for input from the community.

I feel that I have not been represented thoughtfully and would like an opportunity to learn more (with more time) to be actively involved when possible. I have looked for where I may have been notified about this research over the Summer but have not seen any attempts to notify the public.

Perhaps during such a stressful time without the possibility of open forum discussion this could be given more time for resident input as the proposed changes seem very significant? I am doing my best now to watch the posted videos to catch up but I feel the haste is not necessary at this time. You plan to implement these by year end if I understand correctly?

I ask that you consider giving county residents more time and details to understand the changes and impacts that you are proposing.

Respectfully,

Deborah S. Jackson
